

YOGESH KUMAR CHATURVEDI

Java Backend Developer | Spring Boot | Microservices | REST APIs
+91 62635 59606 • cyogesh10h@gmail.com • Dombivli West, Mumbai – 421201

PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience building scalable, production-grade enterprise applications using Spring Boot, Spring Security, and RESTful APIs. Skilled in JWT-based RBAC, third-party API integration automated email workflows via JavaMailSender, CSV/Excel data import-export using Apache POI and OpenCSV, and MySQL performance optimization. Experienced across the full SDLC in monolithic architectures with active exposure to Microservices.

TECHNICAL SKILLS

Languages:	Java, SQL, HTML, CSS, JavaScript (jQuery)
Frameworks:	Spring Boot, Spring MVC, Spring Security, Hibernate / JPA, JDBC, Apache POI, OpenCSV
Security & APIs:	JWT, RBAC, REST APIs, JavaMailSender (Spring Mail), AJAX, JSON
Databases:	MySQL – schema design, query optimization, indexing, stored procedures
Tools:	Postman, Jira, Manual Testing
Architecture:	Monolithic Microservices (in progress)

PROFESSIONAL EXPERIENCE

Software Developer – Antrix Tech Zone

Sep 2023 – Present | Mumbai, India

- Developed and maintained scalable monolithic backend applications using Spring Boot, Spring Security, and REST APIs.
- Architected JWT-based RBAC authentication and authorization frameworks, enforcing fine-grained access control for multiple user roles.
- Integrated JAS, Maitri, and LGD third-party APIs to auto-fetch live diamond and jewellery product catalogues, eliminating manual product entry.
- Built JavaMailSender-powered email notification system with reusable templates for order confirmations, dispatch alerts, and account workflows.
- Optimized MySQL queries, schema design, and indexing strategies, delivering measurable improvement in API response times by 30%.
- Developed CSV and Excel import/export features using Apache POI and OpenCSV, enabling bulk data operations for product catalogues, order reports, and user records.
- Ensured data integrity and ACID compliance at the persistence layer using Hibernate/JPA transaction management.
- Contributed across the full SDLC – from requirements and design through development, QA, deployment, and post-release support.

KEY PROJECTS

Rohangems – Diamond & Jewelry E-Commerce Platform

Java | Spring Boot | Spring Security | MySQL | JWT | REST APIs | Hibernate/JPA | JavaMailSender | Apache POI | OpenCSV

- Implemented JWT-based RBAC securing all sensitive endpoints with role-specific access for admin, staff, and customer personas.
- Integrated third party APIs to fetch and sync live product catalogues in real time – no manual product management required; API responses mapped to a unified internal product schema.
- Built CSV and Excel import/export functionality using Apache POI and OpenCSV – admins can bulk-export order reports and, bulk-import Celestial product data to CSV.
- Built transactional email templates using JavaMailSender for order confirmations, dispatch notifications, and account registration flows.
- Developed REST APIs for order and user management covering end-to-end CRUD with validation, error handling, and role-based data access.
- Integrated Parcel Pro API for automated shipment dispatch and real-time order tracking, reducing logistics handling time.

Library Management System (LMS)

Java | Spring Boot | Spring Security | MySQL | JWT | Hibernate/JPA | JDBC | JavaMailSender | Apache POI | OpenCSV

- Independently built a full-featured LMS with role-based workflows: students request books, staff approve/assign within their department, admins manage the entire system.
- Engineered department-scoped access control so staff operate only within their inventory, while admins retain global oversight.
- Implemented CSV and Excel import/export using Apache POI and OpenCSV – admins can export book inventory, member records, and fine reports to Excel, and bulk-import new books or users via CSV upload.
- Integrated JavaMailSender to automate student notifications for book approvals, due-date reminders, and fine alerts – replacing all manual communication.
- Designed an automated fine calculation engine on overdue returns with real-time inventory updates during issue and return transactions.

EDUCATION

Master of Computer Applications (MCA)

2024 | CGPA: 8.25 / 10

LNCT University, Bhopal

Bachelor of Science – B.Sc. (Computer Science)

2021 | CGPA: 6.3 / 10

Govt. (Autonomous) P.G. College, Satna
